

Riga

26 May 2022

The company Kinetics Nail Systems Ltd. has been working with an Independent Expert Bureau "GE&AL" for several years and we are very delighted with the result they have shown. We appreciate the representatives and their professionalism, thorough work, and individual approach when working with the clients. We also greatly appreciate the speed of work execution.

Expert Bureau "GE&AL" was chosen to support the preparation of documentation, safety reports, PIFs, and consulting on European Legislation in Cosmetic Products. We had a very good experience of obtaining professional expert conclusions on the use of claims for cosmetic products.

We thank the Expertise Bureau "GE&AL" team for their quick responsiveness and good work. We sincerely recommend them as a responsible and competent partner for any issues that arise that are related to EU Regulation 1223/2009, and assistance in preparing all the necessary documentation for the EU market.
