TO WHOM IT MAY CONCERN

Subject: EcoLabs Letter of Support for Singapore EP Application

482.Solutions has been a partner of EcoLabs – Centre of Innovation for Energy at NTU (EcoLabs) since May 2020. As a part of this collaboration, EcoLabs supports 482.Solutions with the access to the local energy innovation ecosystem for further development and commercialization of innovative transactive energy management platform pioneered by 482.Solutions - Electrodo. EcoLabs is also ready to host 482.Solutions in the office of Energy Research Institute @ NTU for closer collaboration on existing and future projects.

In 2021, 482.Solutions and local SME Pylon City were awarded a grant under EUREKA GlobalStars-Singapore Call for development and commercialization of PyDEN-Electrodo platform for achieving sustainable living in HDB with end-to-end energy tracking and reward system on a blockchain. This platform will allow users (HDB households & others) to track, automate and account their energy sustainability goals, buy and sell clean electricity using virtual energy assets, and operate carbon-neutral charging stations for electric vehicles. PyDEN-Electrodo solution will be also a part of Project Shea – joint initiative of EcoLabs and Mistletoe Inc, where Roman Kravchenko is a principal investigator from 482.Solutions side.

Based on the above-written, we acknowledge that the full-time presence of **Mr. Roman Kravchenko – CEO of 482.Solutions** in Singapore is needed for successful execution of projects.

Kind regards,

Mahesh KUMAR
Programme Director
EcoLabs Centre of Innovation for Energy
