

WHERE ENVIRONMENTALISTS & WIND DEVELOPERS UNITE

MCL GROUP – a professional team with over 12 years of experience in the renewable energy market of Ukraine. The initial objective of the company was to help clients fulfill their nature-positive goals and to offer them professional environmental guidance and assistance. However, later our focus has been expanded to designing and developing renewable energy projects. Currently, the company owns a large portfolio of co-developed green generation (more than 500 MW) and develops its own wind projects from scratch.

OUR SERVICES FOCUS ON:

EIA procedure

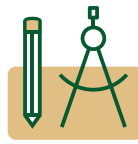

Ecological surveys, incl.
ornithology in line with
international practices

ESG consulting

Development of
autonomous wind
energy projects

Design & engineering

Preparation of environmental
& technical documentation at
all design stages

WE ARE COMPANY THAT CARES! Our activity based on modern international practices and standards. Due to the availability of our own specialized equipment, we are able to most effectively conduct both field environmental studies and wind measurements.
